United States 1941 v1.0

A-30 Baltimore

An development of the **Maryland** bomber, Martin increased the size of the fuselage and upgraded the engines to create a sturdy and fast light bomber. Designated **A-30** by the US Army Air Corps, it was never used by the US. Instead, it was pressed into service with British and Commonwealth forces, which renamed it the **Baltimore** and employed it extensively in North Africa and the Mediterranean.

Variants

A-30 This data card represents all variants of the bomber, including the British-designated **Baltimore B.I**, **B.II**, **B.III**, **B.IV** and **B.V**
